

A portable electronic viewer system is provided for satisfying both the demand for portability and the demand for containing a large volume of contents. The portable electronic viewer system comprises a portable server division (500) provided with a hard disk (502) of 2.5 inches or smaller for storing book-type information containing at least either images or characters and a viewer division (510) for displaying page-by-page the book-type information sent wirelessly from the portable server division at a transfer rate of less than 16Mbps.
